Loot

Loot in Nightreign can be found by defeating enemies, looting chests, and destroying certain overworld objects. It includes items, upgrades, passive skills, active skills, affinities and more.

When a boss is killed, the player is offered a choice between 3 loot drops, typically passive or active skills or rare items.

Regular drops are shared between players, with all items available to all 3 members of the party. Boss drops, however, are unique, and are specific to each player.
